## Message from the Head of Accounting Department

In the name of Allah, the Most Gracious, the Most Merciful, and peace and blessings be upon the most honorable of the Messengers, our master and prophet Muhammad, and upon all his God and companions. I am delighted to welcome you to the Master of Accounting Science program, which represents a quantum leap in your academic and professional career. This carefully designed program seeks to equip you with the knowledge and skills necessary to keep pace with the rapid developments in the world of accounting, and enable you to assume leadership roles in various organizations.

We at the accounting department believe that this program is an investment in your future, and an investment in the future of our society. Accounting is the language of business and the foundation on which strategic decisions are built. Our program seeks to graduate highly qualified academics and professionals who are able to analyze complex financial statements, make sound decisions, and contribute to the sustainable growth of the organizations in which they work.

This program aims to provide you with a solid foundation in academic accounting knowledge, and to provide you with advanced analytical and critical skills. The program curriculum will cover a wide range of topics, including advanced studies in both financial and management accounting, auditing, cost accounting and information systems, research methods, and others.

This program has provided you with many opportunities for professional and personal development. You will have the opportunity to interact with elite academics and professionals in the field of accounting, and benefit from their experience and knowledge. You will also have the opportunity to participate in research activities and consulting projects, which will contribute to the development of your practical skills.

We aspire for graduates of this program to be future leaders in the field of accounting, able to meet the challenges posed by the ever-changing world of business.

Head of Accounting Department

Dr. Munirah bint Muhammad Alnefaie

# About the program

The Department of Accounting was established in 1420 AH as a division in the Department of Economics and Administrative Sciences at the College of Sharia, and the first batch of the division graduated in 1424 AH, then the division turned into a department when the royal approval was issued to convert the Department of Economics and Administrative Sciences at the College of Sharia into an independent college under the name of "College of Economics and Administrative Sciences" in 1427 AH. In the first semester of 1427/1428 AH, the first batch graduated in the name of the Department of Accounting at the Faculty of Economics and Administrative Sciences. The department is one of the largest departments of the college in terms of the number of students and faculty members due to the steady need for the accounting profession in the Kingdom.

It has now emerged in recent years that the Saudi market is characterized by rapid growth and development in various economic fields, and it has expanded in the scope of active and commercial workers significantly, which requires the presence of accountants and auditors who possess the competencies and scientific capabilities to build the capacity of Saudi labor institutions that operate in a changing international business environment. In line with the need in the public and private sectors in the Kingdom of Saudi Arabia to develop the skills and capabilities of leaders in the field of accounting and auditing, the College of Economics and Administrative Sciences, represented by the Department of Accounting, adopted the launch of the Master of Science in Accounting program as a contribution from the department to meet this need to raise the level of accounting skills and knowledge and to push the development process in the field of higher education in preparing qualified national cadres and in response to scientific and practical developments and local, regional and global developments in the aspect of the accounting profession. and review.

In order to achieve the noble and comprehensive objectives of Al-Imam Muhammad bin Saud Islamic University, which is represented in the university's mission as a scientific and cultural institution concerned with the implementation of educational policies aimed at providing undergraduate and postgraduate education and the advancement of scientific research, the design of the program took into account international standards in labor management colleges and the requirements of the labor market in addition to the requirements set by the unified regulations for graduate studies regarding the development of graduate programs, and the requirements of the National Commission for Academic Accreditation and Assessment with regard to the characteristics of the program. and the description of its courses.

## Mission and Goals

### Mission

Preparing competitive competencies qualified scientifically and research-wise in accounting sciences that meet the requirements of the labor market and excel in scientific research, and contribute to community service in a way that enhances sustainable development.

### Goals

- 1- Qualifying competitive graduates in the field of accounting that meet the requirements of the labor market.
- 2- Encouraging graduates and faculty members to publish scientific research in various fields of accounting.
- 3- Motivating graduates and faculty members to make effective contributions to serve the community and promote sustainable development.

## Program Duration

- The number of courses is 12 courses.
- Research project.

## Admission Requirements

- Holds a bachelor's degree in accounting with a grade of at least very good.
- To have a score of 70 in the abilities of collectors.
- Must have a TOEFL score of 500 or equivalent.
- Pass the written test prepared by the accounting department.

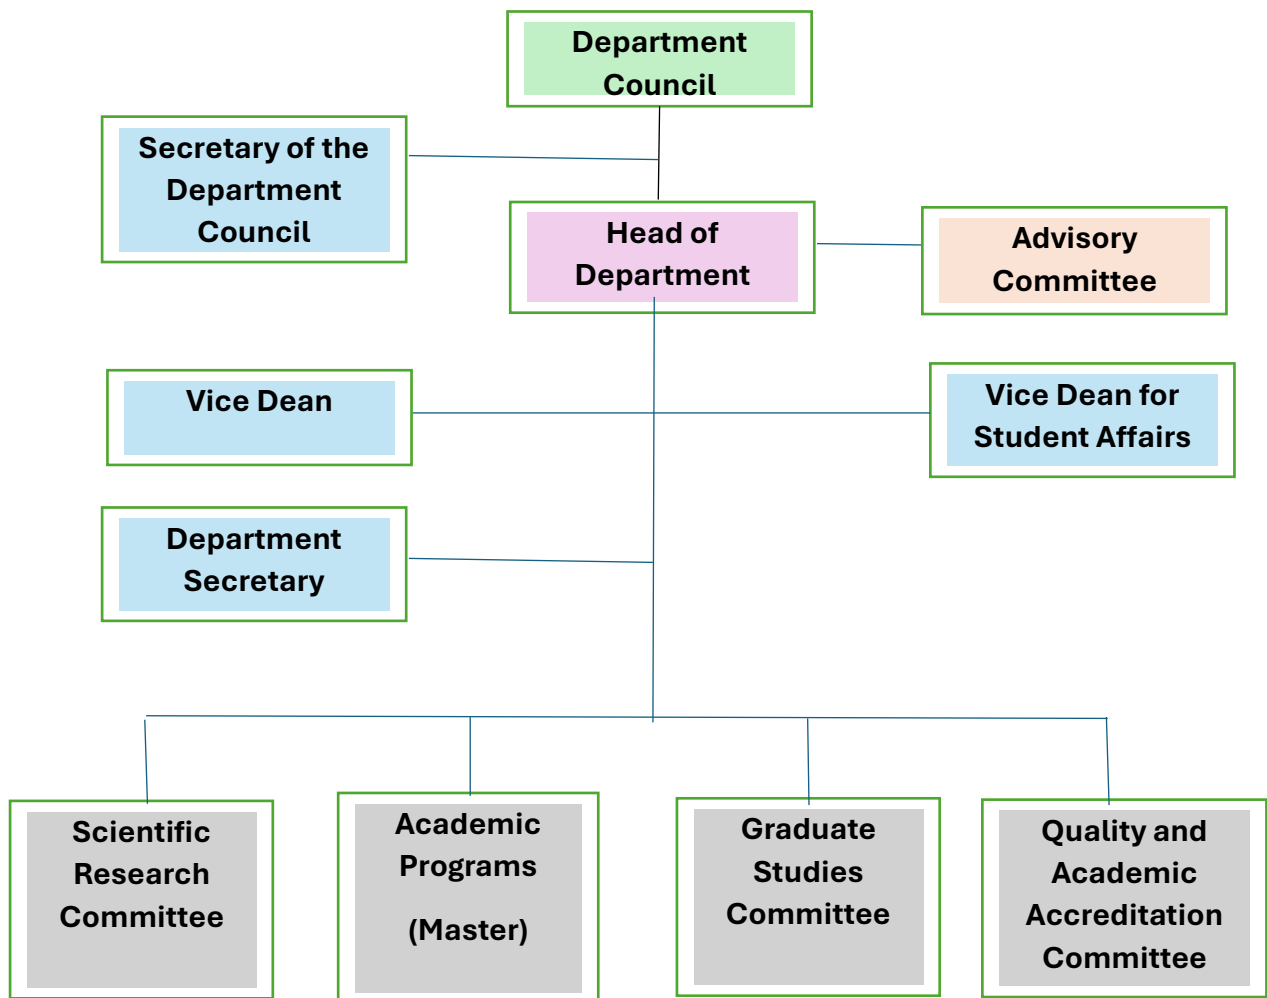

## Program Learning outcomes

K1	Knowledge and Understanding	Explains deeply the concepts, principles, theories and adopted accounting and auditing standards.
K2		Clarifies, with precision, modern accounting procedures and practices related to contemporary issues in accounting and auditing field.
K3		Identifies research methodology and investigation methods related to contemporary accounting topics.
S1	Skills	Applies principles, theories, adopted accounting and auditing standards, in complex contexts, to solve problems in accounting, and auditing field.
S2		Evaluates fundamental accounting principles and theories, through purposeful critical analysis, to provide creative solutions to complex problems in accounting and auditing field.
S3		Uses appropriate research methodology and investigative methods to prepare advanced research projects that address contemporary issues in accounting and auditing field.
S4		Applies quantitative and/or qualitative methods and information technology to process and analyze data and information, in complex contexts related to accounting and auditing, and communicating in a variety of ways to convey results.
V1	Values, Autonomy, and Responsibility	Adheres to professional and human values and ethics in dealing with various issues and problems related to accounting and auditing.
V2		Initiates independently in planning and following up to complete a research work.
V3		Collaborates effectively within a team to address issues related to accounting and auditing, taking on leadership role, assuming responsibility, and contributing to community service and sustainable development.

# Study Plan

Level	Course Code	Course Title	Required or Elective	Pre-Requisite Courses	Credit Hours	Type of requirements (Institution, College, or Program)

### Breif description of cources' contents

Course Code	Course Title (English)	Course Title (Arabic)	Credit Hours	Number of teaching units		
				Theoretic al Hours	Practical Hours	Total Hours
ACCT6101	Accounting Theory	نظرية المحاسبة	5	5	0	5

This course explores a range of theoretical and practical approaches used to investigate financial accounting practices and their impact on users and society. It is designed for students who wish to further their research into the core of the accounting field at an advanced level. Various conceptual issues in accounting literature will be presented, such as the historical development of accounting, the relationship between social sciences and accounting, and the theoretical basis for some important contemporary issues facing accounting as a profession.

Course Code	Course Title (English)	Course Title (Arabic)	Credit Hours	Number of teaching units		
				Theoretic al Hours	Practical Hours	Total Hours
ACCT6102	Studies in Management and Cost Accounting	دراسات في المحاسبة الإدارية والتكاليف	4	4	0	4

This course covers various contemporary management accounting techniques, including activity-based costing, strategic performance measurement systems, and strategic cost analysis. It also explores the skills and competencies that management accountants need to leverage the opportunities offered by modern management accounting methods.

Course Code	Course Title (English)	Course Title (Arabic)	Credit Hours	Number of teaching units		
				Theoretical Hours	Practical Hours	Total Hours
ACCT6104	Advanced Studies in Financial Accounting	دراسات متقدمة في المحاسبة المالية	4	4	0	4

This course covers the skills necessary to identify, analyze, and evaluate financial accounting problems, with a focus on the methodology for dealing with contemporary local and international accounting solutions for medium and large economic units in light of accounting standards. It also covers accounting topics related to revenue recognition, investment treatment, consolidated financial statements, financial leasing, inflation, hedging against financial risks, speculation, and accounting for intangible assets.

Course Code	Course Title (English)	Course Title (Arabic)	Credit Hours	Number of teaching units		
				Theoretical Hours	Practical Hours	Total Hours
ACCT6105	Forensic Accounting and Fraud Investigation	المحاسبة القضائية والتحقق في الاحتيال	4	4	0	4

Forensic accounting is gaining significant attention as a field within accounting and auditing. Forensic accountants provide services related to fraud detection and investigation, which are directly linked to forensic accounting. This course explores the fundamentals of forensic accounting, the role of the forensic accountant in today's economy, and various topics such as fraud detection and investigation techniques, business valuation, analysis of lost profits, and different types of litigation support services. Additionally, it will cover the basic legal concepts governing expert witness testimony through the analysis and discussion of past fraud cases.

Course Code	Course Title (English)	Course Title (Arabic)	Credit Hours	Number of teaching units		
				Theoretical Hours	Practical Hours	Total Hours
ECO6103	Econometrics	اقتصاد قياسي	3	3	0	3

This course covers the statistical tools needed to understand experimental economic research, plan, and implement independent research projects. Topics include statistical inference, regression, least squares, endogenous variables, and simultaneous equation models. Emphasis will be placed on sources of economic data, economic applications, and the use of statistical software packages.

Course Code	Course Title (English)	Course Title (Arabic)	Credit Hours	Number of teaching units		
				Theoretic al Hours	Practical Hours	Total Hours
ACCT6107	Studies in Auditing and Corporate Governance	دراسات في المراجعة وحوكمة الشركات	5	5	0	5

This course is designed to provide graduate students with an opportunity to understand auditing theory and practice through case studies and research. The course aims to achieve its objectives by utilizing prior knowledge of auditing fundamentals, standards, and procedures, along with knowledge from internal and external auditing courses at the undergraduate level. This approach will provide students with a new and contemporary perspective on corporate governance tools and a scientific explanation of how auditors contribute to corporate governance and its impact on the quality of accounting information.

Course Code	Course Title (English)	Course Title (Arabic)	Credit Hours	Number of teaching units		
				Theoretic al Hours	Practical Hours	Total Hours
ACCT6209	Studies in Accounting Information Systems	دراسات في نظم المعلومات المحاسبية	4	4	0	4

This course is designed to provide graduate students with an opportunity to understand the general framework of accounting information systems, subsystems, planning, analysis, design, and documentation of accounting information systems, automated applications of accounting information systems, auditing of accounting information systems, and control, security, and protection of accounting information systems.

Course Code	Course Title (English)	Course Title (Arabic)	Credit Hours	Number of teaching units		
				Theoretic al Hours	Practical Hours	Total Hours
ACCT6210	Capital Markets Research in Accounting	بحوث الأسواق المالية في المحاسبة	5	5	0	5

This course aims to provide a comprehensive overview of the relationship between financial accounting theory, applied research, and practice. It focuses on two main research models: the use of accounting information in capital markets and the factors influencing the formulation and choice of accounting policies.

Course Code	Course Title (English)	Course Title (Arabic)	Credit Hours	Number of teaching units		
				Theoretic al Hours	Practical Hours	Total Hours
ACCT6211	Research Methods and Methodology in Accounting	مناهج وطرق البحث في المحاسبة	5	5	0	5

This course introduces students to various research methods used to identify, analyze, and evaluate information and references in both academic and professional settings. It explores the strengths and limitations of qualitative and quantitative methodologies, providing students with the opportunity to understand the decisions and steps involved in formulating and implementing a research methodology. Additionally, the course provides an overview of the different approaches, considerations, and challenges encountered in social research, with a focus on accounting as a social science.

Course Code	Course Title (English)	Course Title (Arabic)	Credit Hours	Number of teaching units		
				Theoretic al Hours	Practical Hours	Total Hours
MNGT6016	Strategic Management	الإدارة الاستراتيجية	3	3	0	3

This course aims to explain the process of strategic management, which includes the company's mission and vision, internal analysis to identify strengths and weaknesses, external analysis to identify opportunities and threats, formulating the company's business strategy, functional strategies, and implementing and evaluating the chosen strategies to identify and correct any necessary actions. The course also covers international strategies and focuses on the competitive advantages of efficiency, quality, innovation, and customer responsiveness that underlie most strategies. Students will learn relevant concepts <sup>1</sup> and methods and develop the ability to analyze and formulate strategies through a variety of means, including case studies and simulations. Additionally, they will learn how to work effectively as members of a strategic team by collaborating with others to analyze cases and solve business problems.

Course Code	Course Title (English)	Course Title (Arabic)	Credit Hours	Number of teaching units		
				Theoretic al Hours	Practical Hours	Total Hours
FINA6208	Financial Engineering	الهندسة المالية	3	3	0	3

This course covers the concept of financial engineering, hedging, and its types, as well as the main types of derivatives (futures, options, swaps). It also explores the pricing mechanism of derivatives, the limitations of Islamic financial engineering (avoiding interest and uncertainty), and the principles and strategies for developing Islamic financial products. Additionally, the course delves into applications of Islamic financial engineering in various sectors such as financial markets, banking, and cooperative insurance.

Course Code	Course Title (English)	Course Title (Arabic)	Credit Hours	Number of teaching units		
				Theoretical Hours	Practical Hours	Total Hours
FINA6108	Corporate Valuation	تقييم الشركات	3	3	0	3

This course covers the fundamental concepts of corporate valuation and the essential financial and accounting information needed for valuation. It focuses on teaching the most important methods for valuing companies in mergers and acquisitions, initial public offerings, and other special valuation situations. The course also covers modern corporate valuation principles, principles for valuing venture capital-funded companies, and the Islamic principles for corporate valuation.

Course Code	Course Title (English)	Course Title (Arabic)	Credit Hours	Number of teaching units		
				Theoretical Hours	Practical Hours	Total Hours
ACCT6291	Research Project	مشروع البحث	4	4	0	4

This course aims to develop students' ability to conduct empirical research on: (1) the role of accounting information in organizations and financial markets, and (2) how managers choose their discretionary reporting powers for their companies and their disclosure strategies. Through this course, students will develop an understanding of economic, financial, and accounting theories that will enable them to conduct empirical accounting research. The focus will be on identifying and understanding the three critical elements of each study: (1) the research question, (2) motivation, and (3) research design. Each student is expected to contribute and add to the accounting literature to motivate their paper. Upon completion of the course, students should be able to:

- Demonstrate a deep understanding and insight into the researcher's research topic after critically analyzing the available literature.
- Demonstrate the ability to formulate and research questions and develop an appropriate strategy to achieve those questions.
- Identify and propose modifications to existing knowledge structures and theoretical frameworks.
- Demonstrate expertise in<sup>1</sup> following up on the research topic and study after critically analyzing the available literature.
- Demonstrate self-direction and originality in completing a research project at an advanced level that contributes to a specific research field, with minimal supervision.
- Communicate and defend the logic, methods, results, and conclusions of the research through a comprehensive report written in a clear and accessible manner for both specialists and non-specialists.
- Recognize the in-depth relationships between research findings and evidence-based practice and decision-making within the research field from a practical perspective.
- Develop a methodology that reflects the research process and results.
- Properly document the work of others, adhering to the university's regulations regarding plagiarism and academic misconduct.
- Demonstrate the ability to report and express ideas and information fluently, and work comprehensively in visual forms, orally, and in writing at a professional level.

## Academic Advising Services

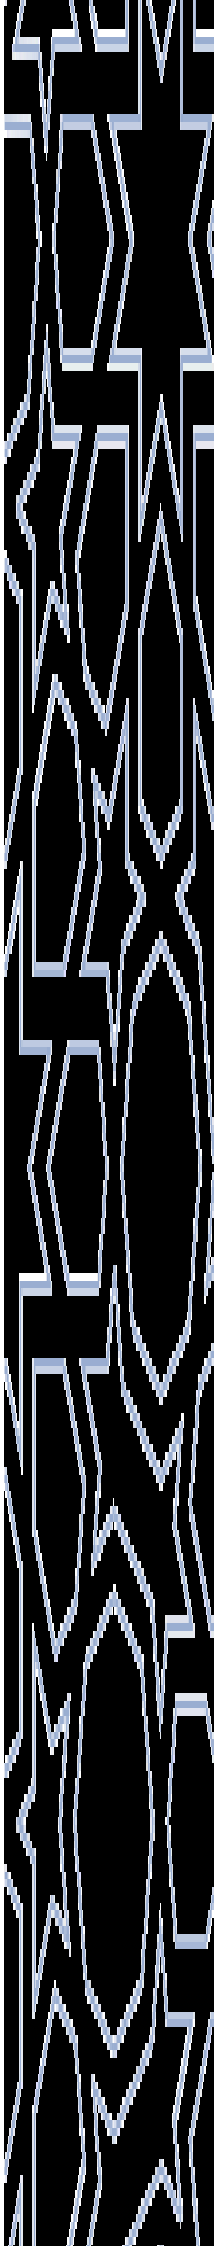

After an academic advisor is determined for each student in the master's program by the Graduate Studies Committee in the Department of Accounting and in coordination with the program director with the aim of improving academic performance, adapting to the university environment, professional development and improving mental health, therefore academic, vocational, psychological, and social counseling services are as follows:

### First , Academic Advising Services

- Providing academic advising: **Assisting students in choosing appropriate courses, developing self-study skills, and managing time effectively.**
- Guiding students in scientific research procedures: **assisting students in choosing a research topic, setting research objectives, developing research methodology, and writing scientific reports.**
- Provide support in solving academic problems: **Assist students in dealing with any academic difficulties they may face, such as difficulty understanding the material, or late submission of assignments.**
- Career guidance: **Helping students determine their future career path and develop the skills necessary for the labor market.**

### Second, Career Counseling Services

- Skills and tendencies assessment: **Conduct tests to assess students' skills and abilities, and help them discover their strengths and weaknesses.**
- Career counseling: **Assisting students in identifying career options, providing information about the labor market.**

- 
- Professional skills development: **Organizing workshops and training courses to develop students' professional skills, such as communication skills, problem solving, and teamwork.**
  - Assist students in preparing CVs and cover letters: **Assist students in preparing the documents required to apply for jobs.**

### **Third. Psychological and social counseling services**

- Providing psychological counseling: **helping students deal with psychological problems such as anxiety and depression, and improving their mental health.**
- Provide social support: **help students build positive social relationships, and overcome loneliness and isolation.**
- Organizing awareness programs: **organizing awareness programs on mental health, time management, proper nutrition and exercise.**
