## B. Course Objectives and Learning Outcomes

### 1. Course Description

This four-hour weekly course is not based on formal instruction. The *Translation Field Project* (TP) is designed to facilitate the final year student's task of writing a graduation project. The student to supervisor ratio for this course is from 4 to 6 students per supervisor. The nominated supervisor guides students to choose from the following options to complete this course successfully:

1. Either to conduct an in-house translation project based on field-related materials.
2. Or conduct a field-based translation or interpreting project where the student reports to work in a professional translation organisation.

In both options, the student should select a text (in coordination with his/her TP supervisor and possibly company supervisor) and translates it into one of the languages of this translation pair: English-Arabic in either direction. The source text has to be original, current and relevant, and has not been translated. The text should belong to any of the register types listed herein: Islamic, literary, medical, legal, business, scientific, technical, or journalistic. In addition to translating the text, the TP student is expected to write a theoretical section (reflective report and commentary on his/her translation) in which he/she accounts for the criteria of source text selection, translation decisions, translation problems, and adopted solutions. The TP final draft needs to follow certain writing and binding conventions set by the Department of English Language and Literature outlined in the TP syllabus and manual.

## 2. Course Main Objective

**By the end of this course, students should be able to:**

1. To select translation the source text and state the rationale behind choosing it.
2. To recognize the differences between translation strategies and techniques (or procedures).
3. To outline the merits and demerits of available translation strategies, approaches and procedures.
4. To write a coherent, cohesive, error-free target text.
5. Manage their translation project with all its academic and professional aspects professionally.
6. Develop their TP content gradually and professionally light of proofreading symbols and feedback received from their CLT and/or company supervisor.
7. To show signs of ethical and professional behaviour.
8. Defend their TP and its content in a presentation professionally and confidently.

## E. Student Academic Counseling and Support

### Arrangements for availability of faculty and teaching staff for individual student consultations and academic advice:

- Instructors are available during their assigned office hours usually from two to four hours depending on their teaching loads.
- Instructors devote approximately ten minutes at the end of each lecture for receiving students' questions in relation to the latest lecture as well as the student's revision and self-study problems.
- Instructors are assigned one hour for student academic advising.
- Faculty emails are accessible for students.
- Online interaction between instructor and student is available using the university's official online platforms (e.g., Microsoft Teams, Blackboard Learn, Microsoft Kaizala).
