Making a course available to students

Courses need to be made available for the students to access its contents. Similarly, if a course is not past the building process or is on the contrary finished, you may want to make it unavailable to students.

Steps to make a course available

1. On the Control Panel, expand the Customization section and click Properties.
2. In the Set Availability section, click Yes or No.
3. Optionally, when making a course available, you can choose one of the following options in the Set Course Duration section:
   - Continuous (default) to leave the course available without a specified start or end date.
   - Select Dates to choose a start and/or end date. The start and end **times** are set automatically. The start time is midnight and the end time is 11:59:59.
   - Days from the Date of Enrollment to specify a specific length of time users have to access the course after enrolling. This is the best option for self-paced courses.
4. Click Submit.
