Student can elect this course to prepare a research project under the supervision of a faculty member. the main purpose for this course:

- This course enables major students to carry out a sustained, guided, independent study of a topic in Chemistry.
- This course is a faculty directed project that could be considered an initiation of the student to the research and lab investigations.
- To develop an appropriate chemistry literacy as well as competency in documentation, analyses and presentation of results.
- To develop experience of report-writing, oral presentation and visual presentation.
