

Chemistry Department's Seminar Schedule for the Second Semester- 1442

	Faculty name	time	Seminar date	Seminar subject
1	Dr. Ahlam Guesmi	1:30 - 2:00	Monday 08/03/2021	Valorization of Anthocyanin pigments extracted from <i>Phytolacca Americanna</i> L. fruits as bio-colorant to dye wool yarns
2	Dr. Fatima Adam	1:30 - 2:00	Monday 15/03/2021	Adsorption behavior of barium ions onto ZnO surfaces: Experiments associated with DFT calculations
3	Dr. Nuha Yousif Elamin	1:30 - 2:00	Monday 22/03/2021	Adsorption behavior of barium ions onto ZnO surfaces: Experiments associated with DFT calculations
4	Dr. Eida Alfaraj	1:30 - 2:00	Monday 29/03/2021	Complexation equilibria of Zn(II) complexes contain pyridoxine HCL and some bioligands: pH-metric studies
5	Dr. Wesam Abd el fattah	1:30 - 2:00	Monday 05/04/2021	Synthesis and cytotoxicity screening of some novel 1,2,4-Triazine derivatives against liver carcinoma cell lines
6	Dr. Amaal Almutairi	1:30 - 2:00	Monday 12/04/2021	Synthesis, Antimicrobial, and Anti-Proliferative activities of novel 4-(Adamantan-1-yl)-1-arylidene-3-thiosemicarbazides, 4-arylmethyl NO-(Adamantan-1-yl) piperidine-1-carbothioimides, and related derivatives
7	Dr. Hala Hamdi Ferjani	1:30 - 2:00	Monday 19/04/2021	Broad-band luminescence involving fluconazole antifungal drug in a lead-free bismuth iodide perovskite: Combined experimental and computational insights
8	Dr. Sara Talab	1:30 - 2:00	Monday 26/04/2021	Dependence of the electrical properties of Cu-doped ZnO nanoparticles decorated by Ag atoms
